

| PROJECT SCOPE STATEMENT | |
|--|--|
| Project Name | MovieDiscuss |
| Project Deliverables | Detailed Description |
| View recommendation/ new releases | Users would be shown a collection of movie/ series releases. This would be on the home page and would be the first thing users see when they go to the website. This collection of movies would serve as a form of notice of a new movie release and also as a recommendation for what to watch. |
| Movie ratings | Users would be able to rate movies on the website and to view ratings from other users. Ratings would not be shown individually but collectively. |
| Live chat | Users would be able to share their opinions and chat with other users on the website via chat rooms. Movies would have chat rooms that would enable live chat. This would allow fans of a movie chat in real time and discuss their thoughts with people of like tastes. |
| Login/Logout | Users would be able to register on the website and create their own personal accounts/ profile. This is properly save up chat histories of users. |
| Project Exclusions | |
| There would be no push notification for new movie releases. Users would need to go to the website to look at new movie releases and recommendations. | |
| Users would not be able to view other individual users ratings. Movie ratings would only be generally viewed. | |
| Website would not include movie teasers. | |
| There would be no filtering of conversations on the chat rooms to avoid inappropriate conversations and hate speech. | |
