

PROJECT SCOPE STATEMENT	
Project Name	MovieDiscuss
Project Deliverables	Detailed Description
View recommendation/ new releases	Users would be shown a collection of movie/ series releases. This would be on the home page and would be the first thing users see when they go to the website. This collection of movies would serve as a form of notice of a new movie release and also as a recommendation for what to watch.
Movie ratings	Users would be able to rate movies on the website and to view ratings from other users. Ratings would not be shown individually but collectively.
Comments	Users would be able to share their opinions on new releases by leaving comments on new movie releases. The comments can also be viewed by other users
Login/Logout	Users would be able to register on the website and create their own personal accounts/ profile. This is properly save up chat histories of users.
Project Exclusions	
There would be no push notification for new movie releases. Users would need to go to the website to look at new movie releases and recommendations.	
Users would not be able to view other individual users ratings. Movie ratings would only be generally viewed.	
Website would not include movie teasers.	
There would be no filtering of conversations on the chat rooms to avoid inappropriate conversations and hate speech.
